

June, 1998

Dear Viper GT-2 Championship Edition Owner:

We hope you're as thrilled with your Limited Edition Viper GT-2 as we were with the opportunity to build it for you. Our Viper "family" here at Conner Assembly put a lot of pride and skill into hand-crafting your car, and we want you to be able to share some of those moments when your car was on the Line "being born" into the automotive world.

At the suggestion of a V.C.A. member, in your glove box you'll find a disposable 35mm camera, ready to be dropped off at your favorite photo processor; when you get your pictures back, they will reveal the chronology of your particular car as it was being assembled. As your GT-2 moved from station to station, the Conner Avenue Craftspersons in each station took a snapshot of your car and the people who built it for you, as a reminder of the pride they've taken in crafting this incredibly exciting "one of 100" Limited Edition automobile.

This idea came forth too late in the program to really do a downtown job on the camera itself, but we thought it was too cool to pass up, so we did the best we could in the time available. We can't vouch for the quality of the film, but our test shots look pretty good. We urge you to get the film processed as soon as possible, and be sure to tell the processor to open the camera carefully and return the camera (which they normally throw away), which is numbered to match your GT-2's VIN #.

Our Viper Craftsperson men and women were selected to join our Conner Team on the basis of their skill, enthusiasm, and dedication to quality, not on the basis of their photographic skills; no professional photographers were involved with this - the photos are simply honest "snapshots", taken by people who really care about their customers, and no two sets of photos are the same for any of the 100 GT-2 Championship Edition Vipers. There are 24 exposures on the roll, and we have left a few unexposed for you to take a shot or two of you and your new GT-2; send us one and we'll stick it on our refrigerator - might even wind up in **Viper** magazine!

We hope you enjoy your GT-2, and the photos documenting its birth - we make no guarantees about the pictures, except that they're the real thing, and you'll be the very first to see them!

For Dodge and the Conner Viper Family,

John Hinckley
Plant Manager
